Notal Vision Sells Foresee PHP® Business to Reichert Ophthalmic Instruments
Sightpath Medical will no longer distribute Foresee PHP; Reichert to service existing accounts

MINNEAPOLIS – (October 28, 2009) – Notal Vision has sold its Foresee PHP business to Reichert Ophthalmic Instruments. The move allows Notal Vision to fully invest its time and resources in the home-based PHP, which is expected to launch in 2010. Sightpath Medical will distribute the home-based PHP.

Reichert will assume responsibility as the warranty and service provider for all new Foresee PHP customers immediately, and will begin servicing pre-existing accounts effective November 16, 2009. Sightpath Medical's customer service department will continue to provide service and support until that time.

“Sightpath Medical and Reichert are working together to ensure a smooth transition for our Foresee PHP customers,” said Jim Tiffany, President and Chief Operating Officer of TLCVision Corporation and its Sightpath Medical subsidiary. “Both Sightpath Medical and Reichert are confident in and committed to PHP technology, and we at Sightpath Medical are focused on bringing that technology into patients' homes.”

Notal Vision invented the PHP technology in 2001, based on the well-studied visual phenomenon of hyperacuity, to assist in monitoring patients for the conversion from dry to wet Age-Related Macular Degeneration (AMD). This technology is the basis of both the clinic-based PHP and the home-based PHP, which will help AMD patients monitor their condition daily in the comfort of their own homes.

“We are pleased with this decision and are confident Reichert will continue the same level of service that our eye care customers have been accustomed to receiving from Sightpath Medical,” said Barak Azmon, M.D., Chief Executive Officer of Notal Vision. “We are excited about our upcoming home-based PHP and we look forward to working with Sightpath Medical to deliver this device to our patients in need.”

Notal Vision and Sightpath Medical previewed the home-based PHP at the 2009 Annual Meeting of the American Academy of Ophthalmology in San Francisco, October 24-27.

For additional information about the home-based PHP, visit www.notalvision.com, call Sightpath Medical at 1-800-728-9615 or email info@sightpathmedical.com.

###

Sightpath Medical is the leading U.S. provider of mobile and fixed surgical services and equipment for cataracts, glaucoma and refractive procedures. In addition, Sightpath Medical will be the exclusive U.S. distributor of the home-based PHP, manufactured by Notal Vision, an Israel-based medical technology company. Sightpath Medical is dedicated to bringing ophthalmologists and medical facilities the technologies and resources they need to create the patient's best path to sight. Sightpath Medical is a division of TLCVision Corporation. More information about Sightpath Medical can be found on the company's website at www.sightpathmedical.com. More information about TLCVision can be found on the company's website at www.tlcv.com.

Notal Vision was founded in 2000 by medical professionals from internationally renowned hospitals with the goal of introducing a new standard in AMD detection and treatment, educating the public and markedly improving the management of the disease over the next decade.
